Your patients and your practice are important to us. Daiichi Sankyo, Inc. is committed to helping appropriate patients get access to Injectafer by providing access and reimbursement support.

Offering support along the way

Financial Assistance*
- Injectafer Savings Program: Copay savings to reduce patients’ out-of-pocket costs
- Injectafer Patient Assistance Program: Help for uninsured patients with financial need

Coverage and Access Support
- Insurance and claims assistance: Expert help from reimbursement specialists
- Billing and coding: Important information related to Injectafer reimbursement

Contact the IV Iron Hotline, supported by Access Central
1-877-4-IV-IRON (1-877-448-4766)  DSIAccessCentral.com
Available Monday–Friday, 9:00 AM–8:00 PM ET

*Restrictions apply. See terms and conditions on page 4.

INDICATIONS
Injectafer® (ferric carboxymaltose injection) is an iron replacement product indicated for the treatment of iron deficiency anemia (IDA) in adult patients who have intolerance to oral iron or have had unsatisfactory response to oral iron, and in adult patients with non-dialysis dependent chronic kidney disease.

IMPORTANT SAFETY INFORMATION
CONTRAINDICATIONS
Injectafer is contraindicated in patients with hypersensitivity to Injectafer or any of its inactive components.

Please see Important Safety Information on pages 10-11 and click here for full Prescribing Information for Injectafer.
Injectafer Savings Program
Copay savings to reduce patients’ out-of-pocket costs

Injectafer is the only IV iron with a copay assistance program.*

Here’s how much eligible,† insured patients may save on Injectafer

- Assistance of up to $500 per dose with a maximum benefit of up to $1000 per course of treatment (2 doses)
- Enrollment is valid for 2 courses of treatment (4 doses) per 12-month period

For each course of treatment:

Patients receive the FIRST DOSE for as little as $50 Up to 750 mg of iron for qualified patients†‡

Patients receive the SECOND DOSE for as little as $0 Up to 750 mg of iron for qualified patients†‡

Doses are separated by at least 7 days.
Note: The first dose of the second course may cost as little as $50.

Is your patient eligible?†

✓ Has commercial insurance

OR

✓ Pays for treatment with cash

✓ Has Medicare, Medicaid, or other federal or state healthcare insurance

OR

✓ Has private indemnity or HMO insurance that reimburses patients for the entire cost of prescription drugs

OR

✓ Is Medicare-eligible and enrolled in an employer-sponsored health plan or medical or prescription drug benefit program for retirees

IMPORTANT SAFETY INFORMATION
WARNINGS AND PRECAUTIONS

Serious hypersensitivity reactions, including anaphylactic-type reactions, some of which have been life-threatening and fatal, have been reported in patients receiving Injectafer. Patients may present with shock, clinically significant hypotension, loss of consciousness, and/or collapse. Monitor patients for signs and symptoms of hypersensitivity during and after Injectafer administration for at least 30 minutes and until clinically stable following completion of the infusion. Only administer Injectafer when personnel and therapies are immediately available for the treatment of serious hypersensitivity reactions.

In clinical trials, serious anaphylactic/anaphylactoid reactions were reported in 0.1% (2/1775) of subjects receiving Injectafer. Other serious or severe adverse reactions potentially associated with hypersensitivity which included, but were not limited to, pruritus, rash, urticaria, wheezing, or hypotension were reported in 1.5% (26/1775) of these subjects.
Register your office and activate your POS terminal by calling the IV Iron Hotline (1-877-4-IV-IRON)

- The IV Iron Hotline will provide you with a login for injectafercopay.com
- Activation of the POS terminal may take up to 1 business day
- Registration and activation only need to be completed once

Before administering Injectafer, enroll your patient

- Log into injectafercopay.com (you can also enroll the patient at 1-877-4-IV-IRON)
- Enter required patient information
- For each patient, you’ll receive a 16-digit code for a virtual debit card upon approval

After treatment, log in and submit EOB form

- Log into injectafercopay.com
- Submit the Explanation of Benefits (EOB) form for the Injectafer treatment
- There are 3 ways to send the EOB form:
  
  Upload at injectafercopay.com  OR  Fax to 1-888-257-4673  OR  Mail to Injectafer Savings Program
  100 Passaic Ave, Suite 245
  Fairfield, NJ 07004

- It usually takes 2-3 days for EOB to be approved
- Then, funds will be uploaded onto the virtual 16-digit debit card

*As of October 2019.
†The Injectafer Savings Program is only available for adults 18 years or older who are commercially insured or cash-paying patients. Please see full Terms and Conditions on page 4. Insurance out-of-pocket payment must be over $50. Other restrictions may apply.
§When forms are uploaded to injectafercopay.com, the process may potentially be expedited. For patients who wish to directly submit their EOB form, please direct them to fax or mail the form to the Injectafer Savings Program.

Abbreviation: POS, point of sale.

IMPORTANT SAFETY INFORMATION
WARNINGS AND PRECAUTIONS (cont’d)

In clinical studies, hypertension was reported in 3.8% (67/1775) of subjects. Transient elevations in systolic blood pressure, sometimes occurring with facial flushing, dizziness, or nausea were observed in 6% (106/1775) of subjects. These elevations generally occurred immediately after dosing and resolved within 30 minutes. Monitor patients for signs and symptoms of hypertension following each Injectafer administration.

In the 24 hours following administration of Injectafer, laboratory assays may overestimate serum iron and transferrin bound iron by also measuring the iron in Injectafer.
Injectafer Savings Program Terms and Conditions

1. This offer is valid for commercially-insured as well as cash paying patients.

2. Depending on insurance coverage, eligible insured patients may pay no more than $50 for Injectafer for the first dose and $0 for Injectafer for the second dose, up to a maximum savings limit of $500 per dose, a $1,000 program limit per course of therapy. Check with your pharmacist or healthcare provider for your copay discount. Patient out-of-pocket expense may vary.

3. This offer is not valid for patients enrolled in Medicare, Medicaid, or other federal or state healthcare programs, or private indemnity or HMO insurance plans that reimburse you for the entire cost of your prescription drugs. Patients may not use this card if they are Medicare-eligible and enrolled in an employer-sponsored health plan or medical or prescription drug benefit program for retirees.

4. The offer is valid for 2 courses, or 4 doses, of an Injectafer prescription. An explanation of benefits statement must be faxed in prior to transacting on the account numbers for assistance. One enrollment is allowed per 12-month period.

5. Daiichi Sankyo, Inc. reserves the right to rescind, revoke, or amend this offer without notice.

6. Offer good only in the USA, including Puerto Rico, at participating pharmacies or healthcare providers.

7. Void if prohibited by law, taxed, or restricted.

8. This account number is not transferable. The selling, purchasing, trading, or counterfeiting of this account number is prohibited by law.

9. This account number is not insurance.

10. By redeeming this account number, you acknowledge that you are an eligible patient and that you understand and agree to comply with the terms and conditions of this offer.

11. Qualified patients receiving Injectafer will be allowed a 60-day retroactive enrollment period to receive benefits under the program rules.

IMPORTANT SAFETY INFORMATION
WARNINGS AND PRECAUTIONS (cont’d)

In the 24 hours following administration of Injectafer, laboratory assays may overestimate serum iron and transferrin bound iron by also measuring the iron in Injectafer.
Injectafer Patient Assistance Program
Help for uninsured patients with financial need

If your patients are uninsured and need help paying for their Injectafer treatment, they may be eligible for the Patient Assistance Program (PAP). The Injectafer PAP is a product replacement program.*

Eligibility

To qualify, a patient must:
• Meet established income limits
• Lack health insurance completely
• Be a US citizen, a legal entrant in the United States, or a permanent resident

How to apply

Enroll your patient in the program in 1 of 2 ways:
• Visit DSIAccessCentral.com to download the Patient Enrollment Form, have the patient sign the enrollment form, and then fax it to 1-888-354-4856 (preferred method for fastest support)
• Call 1-877-4-IV-IRON

Important timing notice
• Submit the Patient Enrollment Form before the patient’s infusion and confirm enrollment
• After the patient’s infusion, submit the Product Request Form (available for download at DSIAccessCentral.com)
• Plan at least 8 days in advance. In most cases, if you submit the Product Request Form by EOD Wednesday, the product will be shipped overnight the following Wednesday (holidays and weather may cause delays)

*The company reserves the right to modify or cancel the program immediately with respect to any patient, or in its entirety, at any time.

IMPORTANT SAFETY INFORMATION
ADVERSE REACTIONS
In two randomized clinical studies, a total of 1775 patients were exposed to Injectafer, 15 mg/kg of body weight, up to a single maximum dose of 750 mg of iron on two occasions, separated by at least 7 days, up to a cumulative dose of 1500 mg of iron. Adverse reactions reported by ≥2% of Injectafer-treated patients were nausea (7.2%); hypertension (3.8%); flushing/hot flush (3.6%); blood phosphorus decrease (2.1%); and dizziness (2.0%).
Insurance and claims assistance
Expert help from reimbursement specialists

To get help, your first step is to fill out the Patient Enrollment Form and check off the support you require for your patient. We will take it from there.

Based on the support you requested, we will offer you help with:

- Benefits verifications
- Prior authorizations
- Claims appeals

A second way you can get help is to call the IV Iron Hotline, where reimbursement specialists can answer your questions.

Call the IV Iron Hotline at 1-877-4-IV-IRON for more information.

IMPORTANT SAFETY INFORMATION
ADVERSE REACTIONS (cont’d)
The following serious adverse reactions have been most commonly reported from the post-marketing spontaneous reports: urticaria, dyspnea, pruritus, tachycardia, erythema, pyrexia, chest discomfort, chills, angioedema, back pain, arthralgia, and syncope.

To report adverse events, please contact American Regent at 1-800-734-9236. You may also contact the FDA at www.fda.gov/medwatch or 1-800-FDA-1088.

Please see Important Safety Information on pages 10-11 and click here for full Prescribing Information.
Billing and coding

Important information related to Injectafer reimbursement

Proper billing and coding can help ensure eligible patients receive the proper program support. The following codes may be helpful to facilitate Injectafer reimbursement. The completion and submission of coverage-related documentation are the responsibility of the patient and healthcare provider.

Injectafer® (ferric carboxymaltose injection) is an iron replacement product indicated for the treatment of IDA in adult patients:
- who have intolerance to or have had unsatisfactory response to oral iron or
- who have non-dialysis dependent chronic kidney disease

Product and administration codes

<table>
<thead>
<tr>
<th>Code Type</th>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Product Package Code</td>
<td>NDC 00517-0650-01</td>
<td>Injectafer 750 mg iron/15 mL single-dose vial (individually boxed)</td>
</tr>
<tr>
<td>Product-Specific Billing Code</td>
<td>HCPCS J1439</td>
<td>Injection, ferric carboxymaltose 1 mg</td>
</tr>
<tr>
<td>Drug Administration Codes</td>
<td>CPT 96374</td>
<td>Therapeutic, prophylactic, or diagnostic injection (specify substance or drug); intravenous push, single or initial substance/drug</td>
</tr>
<tr>
<td></td>
<td>or 96365</td>
<td>Intravenous infusion, for therapy, prophylaxis, or diagnosis (specify substance or drug); initial, up to 1 hour</td>
</tr>
</tbody>
</table>

We recommend verifying the coding policies for each individual health plan. Reimbursement specialists can provide information relating to payer-specific policies and can address other questions at 1-877-4-IV-IRON.

</tr>
<tr>
<td>D50.8</td>
<td>Other iron deficiency anemias</td>
</tr>
<tr>
<td>D50.9</td>
<td>Iron deficiency anemia, unspecified</td>
</tr>
<tr>
<td>D63.0</td>
<td>Anemia in neoplastic disease CODE NEOPLASM FIRST (Confirm iron deficiency)</td>
</tr>
<tr>
<td>D63.1</td>
<td>Anemia in chronic kidney disease CODE CKD STAGE FIRST (Confirm iron deficiency)</td>
</tr>
<tr>
<td>D63.8</td>
<td>Anemia in other chronic diseases classified elsewhere CODE UNDERLYING DISEASE FIRST (Confirm iron deficiency)</td>
</tr>
<tr>
<td>D64.81</td>
<td>Antineoplastic chemotherapy-induced anemia (Confirm iron deficiency)</td>
</tr>
</tbody>
</table>

Other codes may be appropriate.

Coding for INJECTAFER is dependent on the insurer and the care setting in which the drug will be administered. THESE TABLES ARE PROVIDED FOR INFORMATIONAL PURPOSES ONLY, AND YOU HAVE THE RESPONSIBILITY TO ENSURE THAT CLAIMS AND CODES SUBMITTED ARE ACCURATE, COMPLETE, and APPLICABLE. Healthcare providers need to make coding decisions based on the diagnosis and treatment of each patient and the specific insurer. Please visit CMS.gov or other payers’ websites to obtain additional guidance on their processes.

*A joint effort between the healthcare provider and the coder is essential to achieve complete and accurate documentation, code assignment, and reporting of diagnoses and procedures. This information is provided to assist both the healthcare provider and the coder in identifying POTENTIAL diagnoses. The importance of consistent, complete documentation in the medical record cannot be overemphasized. Without such documentation, accurate coding cannot be achieved. The entire record should be reviewed to determine the specific reason for the encounter and the conditions treated.

A code specific for your IDA patient’s underlying condition*

The following table displays possible secondary ICD-10-CM codes that may be appropriate for patients prescribed Injectafer.†

<table>
<thead>
<tr>
<th>Code</th>

*Secondary code suggestions only; appropriate codes not limited to those listed above. Injectafer is indicated to treat IDA; it is not indicated to treat the above listed underlying conditions. Some listed diagnosis codes may indicate a subcategory and be nonbillable. For reporting purposes, only codes with the full number of required characters are permissible.

†A joint effort between the healthcare provider and the coder is essential to achieve complete and accurate documentation, code assignment, and reporting of diagnoses and procedures. This information is provided to assist both the healthcare provider and the coder in identifying POTENTIAL diagnoses. The importance of consistent, complete documentation in the medical record cannot be overemphasized. Without such documentation, accurate coding cannot be achieved. The entire record should be reviewed to determine the specific reason for the encounter and the conditions treated.

We recommend verifying the coding policies for each individual health plan. Reimbursement specialists can provide information relating to payer-specific policies and can address other questions at 1-877-4-IV-IRON.

The completion and submission of coverage- or reimbursement-related documentation are the responsibility of the patient and healthcare provider. Daiichi Sankyo, Inc., makes no representation or guarantee concerning coverage or reimbursement for any service or item. A completed form includes signatures from both the physician and the patient. Before submitting, please ensure all required information is provided.
INDICATIONS
Injectafer® (ferric carboxymaltose injection) is an iron replacement product indicated for the treatment of iron deficiency anemia (IDA) in adult patients who have intolerance to oral iron or have had unsatisfactory response to oral iron, and in adult patients with non-dialysis dependent chronic kidney disease.

IMPORTANT SAFETY INFORMATION
CONTRAINDICATIONS
Injectafer is contraindicated in patients with hypersensitivity to Injectafer or any of its inactive components.

WARNINGS AND PRECAUTIONS
Serious hypersensitivity reactions, including anaphylactic-type reactions, some of which have been life-threatening and fatal, have been reported in patients receiving Injectafer. Patients may present with shock, clinically significant hypotension, loss of consciousness, and/or collapse. Monitor patients for signs and symptoms of hypersensitivity during and after Injectafer administration for at least 30 minutes and until clinically stable following completion of the infusion. Only administer Injectafer when personnel and therapies are immediately available for the treatment of serious hypersensitivity reactions. In clinical trials, serious anaphylactic/anaphylactoid reactions were reported in 0.1% (2/1775) of subjects receiving Injectafer. Other serious or severe adverse reactions potentially associated with hypersensitivity which included, but were not limited to, pruritus, rash, urticaria, wheezing, or hypotension were reported in 1.5% (26/1775) of these subjects.

In clinical studies, hypertension was reported in 3.8% (67/1775) of subjects. Transient elevations in systolic blood pressure, sometimes occurring with facial flushing, dizziness, or nausea were observed in 6% (106/1775) of subjects. These elevations generally occurred immediately after dosing and resolved within 30 minutes. Monitor patients for signs and symptoms of hypertension following each Injectafer administration.

In the 24 hours following administration of Injectafer, laboratory assays may overestimate serum iron and transferrin bound iron by also measuring the iron in Injectafer.
IMPORTANT SAFETY INFORMATION

ADVERSE REACTIONS
In two randomized clinical studies, a total of 1775 patients were exposed to Injectafer, 15 mg/kg of body weight, up to a single maximum dose of 750 mg of iron on two occasions, separated by at least 7 days, up to a cumulative dose of 1500 mg of iron. Adverse reactions reported by ≥2% of Injectafer-treated patients were nausea (7.2%); hypertension (3.8%); flushing/hot flush (3.6%); blood phosphorus decrease (2.1%); and dizziness (2.0%).

The following serious adverse reactions have been most commonly reported from the post-marketing spontaneous reports: urticaria, dyspnea, pruritus, tachycardia, erythema, pyrexia, chest discomfort, chills, angioedema, back pain, arthralgia, and syncope.
