Injectafer® (ferric carboxymaltose injection) is available by prescription only. Ask your doctor or healthcare provider if Injectafer is right for you.

What is Injectafer?
Injectafer is a prescription iron replacement medicine administered only by or under the supervision of your healthcare provider. Injectafer is injected into your vein to treat iron deficiency anemia in adults. Injectafer should be used only if you have not responded well to treatment with oral iron, or if you are intolerant to oral iron treatment. It is also used to treat iron deficiency anemia in adults with chronic kidney disease who are not receiving dialysis.

It is not known if Injectafer is safe and effective for use in children.

SELECTED SAFETY INFORMATION
Who should not receive Injectafer?
You should not receive Injectafer if you are allergic to ferric carboxymaltose or any of the other ingredients in Injectafer. The active ingredient in Injectafer is ferric carboxymaltose, the inactive ingredients are: water for injection, sodium hydroxide and/or hydrochloric acid.

Click here to see the Full Prescribing Information and see Important Safety Information on pages 10-11.
If you have IDA due to being postpartum or having heavy menstrual bleeding, and oral iron supplements haven’t worked well for you, ask your doctor about Injectafer.1-3

**WOMEN MAY BE AT RISK OF IDA DUE TO CONDITIONS THAT INCREASE IRON DEMAND OR THAT CAUSE IRON DEPLETION THROUGH BLOOD LOSS**

- Childbirth¹
- Long or abnormal menstrual periods²

**COMMON LAB MARKERS FOR MONITORING IDA AND NORMAL VALUES IN ADULT WOMEN⁶-⁸**

<table>
<thead>
<tr>
<th>Marker</th>
<th>Normal Range</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hemoglobin (Hb)</td>
<td>12.0 - 15.5 g/dL</td>
</tr>
<tr>
<td>Ferritin</td>
<td>20 - 200 µg/L</td>
</tr>
<tr>
<td>Transferrin saturation (TSAT)</td>
<td>20% to 50%</td>
</tr>
</tbody>
</table>

The information provided by Daiichi Sankyo, Inc., is informational only and not meant to provide medical advice.

*Normal values can vary for many reasons, including conditions you may have or where your lab work was done. That’s why it’s important to discuss your lab results with your doctor to find out what they mean for you.⁴⁵

**IF YOU’RE BEING TREATED FOR IDA WITH ORAL IRON SUPPLEMENTS, TALK TO YOUR DOCTOR ABOUT RECHECKING YOUR IRON LEVELS TO MONITOR YOUR PROGRESS.⁴**

Certain lab markers in your blood are used to determine whether your iron levels are within the range your doctor feels is normal for you. These values can be used in diagnosing IDA and monitoring your progress on treatment⁴⁵.

If your lab values are below the normal range, it’s important to talk with your doctor about the best option for restoring your iron levels.

**ORAL IRON SUPPLEMENTS MAY WORK WELL FOR SOME WOMEN, BUT MAY NOT FOR OTHERS.⁴**

- Poor iron absorption in the digestive tract makes it able to absorb only a portion of the iron in oral iron supplements⁹.
- Hard-to-tolerate side effects can make daily dosing schedules difficult to stick with for some people⁹.

It’s important to remember that all medicines, including oral and IV iron, have side effects³,⁴.

**IF YOU HAVE SIDE EFFECTS FROM ORAL IRON, OR IF IT ISN’T WORKING WELL FOR YOU, TALK TO YOUR DOCTOR ABOUT THE BENEFITS AND RISKS OF ALL IDA TREATMENT OPTIONS TO DECIDE WHICH TREATMENT MIGHT BE BEST FOR YOU.⁴**

Injectafer has not been studied or approved for treating symptoms of IDA.

**SELECTED SAFETY INFORMATION (CONT’D)**

What should I tell my doctor or healthcare provider before receiving Injectafer?

Before you receive Injectafer, tell your healthcare provider about all of your medical conditions, including if you

- Have had an allergic reaction to iron given intravenously (into your vein), including Injectafer, or to other non-oral iron treatments
- If you have, or have previously experienced, iron overload, or if your body has difficulty using iron appropriately
- Have high blood pressure
- Are pregnant or plan to become pregnant. It is not known if Injectafer will harm your unborn baby. Your healthcare provider will decide if it is safe for you to take Injectafer
- Are breastfeeding or plan to breast feed. Injectafer passes into your breast milk. It is unknown whether Injectafer would pose a risk to your baby. Talk to your healthcare provider about the best way to feed your baby during treatment with Injectafer

Tell your healthcare provider about all the medications you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements.

Click here to see the Full Prescribing Information and see Important Safety Information on pages 10-11.
IF ORAL IRON ISN’T WORKING FOR YOUR IDA, IV IRON MAY BE AN OPTION

With IV treatment (known as infusions), iron is delivered into the bloodstream through a vein.

Since IV iron isn’t processed by the digestive system, 100% is delivered into the bloodstream.

INJECTAFER IS AN IV IRON FOR ADULTS WHO CAN’T TOLERATE ORAL IRON OR WHO DIDN’T RESPOND WELL TO IT

Injectafer has been studied in women who were postpartum or had heavy uterine bleeding.

• Unlike with pills, 100% of the iron in Injectafer goes directly into the bloodstream.

• In clinical studies, Injectafer showed greater increases in hemoglobin, a protein that helps carry oxygen throughout the body, than either oral iron or another IV iron did.

• Injectafer is typically administered at an infusion center, and treatments may take only 15 minutes followed by a period of about 30 minutes, during which you will be monitored for signs of an allergic reaction.

• Each dose provides up to 750 mg of iron, so you can get 1500 mg of iron in just 2 doses.

• Potential side effects with Injectafer include, but are not limited to, allergic reactions, nausea, temporary hypertension, and flushing (see list of side effects on pages 10-11).

ONLY INJECTAFER CAN PROVIDE 1500 mg OF IRON IN TWO DOSES OF 750 mg, SEPARATED BY AT LEAST 7 DAYS

Speak with your doctor or healthcare professional to find out if Injectafer may be appropriate for you.

SELECTED SAFETY INFORMATION (CONT’D)

What are the possible side effects of Injectafer?

Injectafer can cause serious side effects, including:

• Serious allergic reactions that may be life-threatening, including shock, low blood pressure, loss of consciousness, and death. Your doctor or healthcare provider will monitor you for signs and symptoms of an allergic reaction during and after each dose of Injectafer for at least 30 minutes. Other serious allergic reactions include itching, rash, hives, wheezing, or low blood pressure. You should report any signs and symptoms of an allergic reaction to Injectafer, in particular rashes, shortness of breath and wheezing to your doctor or healthcare provider.
GETTING INJECTAFER IV IRON TREATMENTS

INJECTAFER IS USUALLY GIVEN AT AN INFUSION CENTER¹¹

- Infusion centers are medical facilities equipped and staffed for administering infusions and maximizing your comfort¹¹
- Injectafer is given by IV infusion directly into the bloodstream through a vein³
- Each Injectafer infusion may take about 15 minutes, followed by about 30 minutes of being monitored for possible signs of an allergic reaction³

INJECTAFER IS USUALLY GIVEN AT AN INFUSION CENTER¹¹

BE SURE TO CONFIRM THAT THE INFUSION CENTER CAN PROVIDE INJECTAFER

You can easily find an infusion center that provides Injectafer by using the Injectafer Infusion Center Locator at injectafer.com/iron-infusion-center

Or you can ask when making an appointment whether the infusion center can provide Injectafer

MORE IRON IN LESS TIME VS ORAL IRON³¹²

Injectafer is indicated for use in patients who have intolerance to or have had an unsatisfactory response to oral iron.³

BE SURE TO SCHEDULE YOUR 2nd INJECTAFER TREATMENT SO YOU’LL GET THE FULL 1500 mg COURSE OF TREATMENT³

Your iron stores are replenished over time, so it’s important to follow up with your doctor and check your levels.¹³

SELECTED SAFETY INFORMATION (CONT’D)

What are the possible side effects of Injectafer? (CONT’D)

- High blood pressure, sometimes with facial flushing, dizziness, or nausea, has been seen during treatment with Injectafer. This increase in blood pressure typically resolves within 30 minutes. Your doctor or healthcare provider will monitor you for signs and symptoms of an increase in blood pressure following each use of Injectafer.

Other serious side effects that have been reported include rash, difficulty breathing, itching, rapid heartbeat, fever, chest discomfort, chills, swelling of the face, lips, or tongue, back pain, muscle aches, and fainting.

The most common side effects of Injectafer include:

- Nausea, high blood pressure, flushing, low levels of phosphorus in your blood, dizziness, vomiting, headache, an increase in certain liver enzymes, and pain or bruising at the injection site. Potentially long-lasting brown staining of skin near the injection site may occur if Injectafer leaks out of the vein.

Excessive amounts of Injectafer may lead to a condition called iron overload, which is a buildup of iron and may be harmful. These are not all of the possible side effects of Injectafer.

Tell your doctor if you have any side effect that bothers you or that does not go away. Call your doctor for medical advice about side effects.

Click here to see the Full Prescribing Information and see Important Safety Information on pages 10-11.
HOW TO ENROLL
Ask your doctor to enroll you. They will need the last 4 digits of your Social Security number to confirm you’re eligible.
If your doctor cannot enroll you, you can enroll yourself in one of two ways:
• The best way to enroll is by visiting injectafercopay.com
OR
• Call Daiichi Sankyo Access Central (1-866-437-4669)

IF YOU HAVE AN INJECTAFER PRESCRIPTION, YOU MAY BE ABLE TO GET HELP WITH YOUR OUT-OF-POCKET COSTS.

INJECTAFER SAVINGS PROGRAM
If you’re eligible,† you may
• Receive assistance of up to $500 per dose with a maximum benefit of up to $1000 per course of treatment (2 doses)
• Stay enrolled for 2 courses of treatment (4 doses) per 12-month period
Doses are separated by at least 7 days.

For each course of treatment

Patients receive the FIRST DOSE for as little as
Up to 750 mg of iron for qualified patients†

Patients receive the SECOND DOSE for as little as
Up to 750 mg of iron for qualified patients†

PATIENT ASSISTANCE PROGRAM
The Patient Assistance Program was created to help patients who lack health insurance and cannot afford therapy.
Call Access Central to find out if you are eligible.
(See page 12 for eligibility requirements.)

Our toll-free DSI Access Central Hotline
1-866-4-DSI-NOW
is available Monday–Friday, 9:00 AM–8:00 PM ET

†The Injectafer Savings Program is only available for adults 18 years or older who are commercially insured or cash-paying patients. The program provides up to a maximum savings limit of $500 per dose and a maximum benefit of up to $1000 per course of treatment (2 doses). Enrollment is valid for 2 courses of therapy (4 doses). Insurance out of pocket must be over $50. Additional restrictions may apply. Please see full Terms and Conditions on page 16.
About Injectafer

Injectafer® (ferric carboxymaltose injection) is available by prescription only. Ask your doctor or healthcare provider if Injectafer is right for you.

What is Injectafer?

Injectafer is a prescription iron replacement medicine administered only by or under the supervision of your healthcare provider. Injectafer is injected into your vein to treat iron deficiency anemia in adults. Injectafer should be used only if you have not responded well to treatment with oral iron, or if you are intolerant to oral iron treatment. It is also used to treat iron deficiency anemia in adults with chronic kidney disease who are not receiving dialysis.

It is not known if Injectafer is safe and effective for use in children.

IMPORTANT SAFETY INFORMATION

Who should not receive Injectafer?

You should not receive Injectafer if you are allergic to ferric carboxymaltose or any of the other ingredients in Injectafer. The active ingredient in Injectafer is ferric carboxymaltose, the inactive ingredients are: water for injection, sodium hydroxide and/or hydrochloric acid.

What should I tell my doctor or healthcare provider before receiving Injectafer?

Before you receive Injectafer, tell your healthcare provider about all of your medical conditions, including if you:

• Have had an allergic reaction to iron given intravenously (into your vein), including Injectafer, or to other non-oral iron treatments

• If you have, or have previously experienced, iron overload, or if your body has difficulty using iron appropriately

• Have high blood pressure

• Are pregnant or plan to become pregnant. It is not known if Injectafer will harm your unborn baby. Your healthcare provider will decide if it is safe for you to take Injectafer

• Are breastfeeding or plan to breastfeed. Injectafer passes into your breast milk. It is unknown whether Injectafer would pose a risk to your baby. Talk to your healthcare provider about the best way to feed your baby during treatment with Injectafer.

Tell your healthcare provider about all the medications you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements.

What are the possible side effects of Injectafer?

Injectafer can cause serious side effects, including:

• Serious allergic reactions that may be life-threatening, including shock, low blood pressure, loss of consciousness, and death. Your doctor or healthcare provider will monitor you for signs and symptoms of an allergic reaction during and after each dose of Injectafer for at least 30 minutes. Other serious allergic reactions include itching, rash, hives, wheezing, or low blood pressure. You should report any signs and symptoms of an allergic reaction to Injectafer, in particular rashes, shortness of breath and wheezing to your doctor or healthcare provider.

• High blood pressure, sometimes with facial flushing, dizziness, or nausea, has been seen during treatment with Injectafer. This increase in blood pressure typically resolves within 30 minutes. Your doctor or healthcare provider will monitor you for signs and symptoms of an increase in blood pressure following each use of Injectafer.

Other serious side effects that have been reported include rash, difficulty breathing, itching, rapid heartbeat, fever, chest discomfort, chills, swelling of the face, lips, or tongue, back pain, muscle aches, and fainting.

The most common side effects of Injectafer include:

• Nausea, high blood pressure, flushing, low levels of phosphorus in your blood, dizziness, vomiting, headache, an increase in certain liver enzymes, and pain or bruising at the injection site. Potentially long-lasting brown staining of skin near the injection site may occur if Injectafer leaks out of the vein.

Excessive amounts of Injectafer may lead to a condition called iron overload, which is a buildup of iron and may be harmful. These are not all of the possible side effects of Injectafer.

Tell your doctor if you have any side effect that bothers you or that does not go away. Call your doctor for medical advice about side effects.

General information about Injectafer

Injectafer may impact laboratory tests that measure iron in your blood for 24 hours after receiving Injectafer. Let your healthcare provider and laboratory staff know if you have received Injectafer within 24 hours of having blood tests.

To report side effects, contact American Regent at 1-800-734-9236 or E-mail: pv@americanregent.com or Fax: 1-610-650-0170.

You may also report side effects to the FDA at 1-800-332-1088 or www.fda.gov/medwatch.

The risk information provided here is not comprehensive. To learn more about Injectafer, talk with your healthcare provider or pharmacist. The FDA-approved product labeling can be found at www.injectafer.com/pdf/pi.pdf or call 1-800-645-1706.

Click here to see the Full Prescribing Information.
Eligibility Requirements for the Patient Assistance Program
To be eligible for the program, you must
• Completely lack health insurance and be ineligible for public insurance or financing
• Be a US citizen, legal entrant in the United States, or permanent resident. Proof of citizenship or legal residency may also be required
• Meet income and other criteria
Providers (hospitals, physicians, or infusion centers) must apply to the program on behalf of their patients. They will need to fill out and fax the Patient Assistance Request form and Enrollment Application.
